This Review Application has been placed before me in Chamber along with the record of OA-302 of 1996. I have perused the Review Application as well as the record of OA-302 of 1996. I have also taken into consideration the assertions now being made in the Review Application and also the assertions which had been made at the time of the hearing of the above mentioned OA and the documents which were on record of the OA and which were considered ^{while} ~~by~~ passing the order dated 10.7.1997. On a consideration of the entire material I do not find that the Review Application merits a hearing. In the circumstances the RA is rejected.
